FINAL FBI APPROVAL / DETERMINATIONS / CONDITIONS:

☐ PIA is required by the E-Government Act.

☒ PIA is to be completed as a matter of FBI/DOJ discretion. However, this will be accomplished by completing an updated Routine Database PIA Checklist.

Is PIA to be published on FBI.GOV (after any RMD FOIA redactions)? ☐ Yes. ☒ No : Because this is a national security system, the PIA will not be published.

☐ PIA is not required for the following reason(s):

- ☐ System does not collect, maintain, or disseminate PII.
- ☐ System is grandfathered (in existence before 4/17/2003; no later changes posing significant privacy risks).
- ☐ Information in the system relates to internal government operations.
- ☐ System has been previously assessed under an evaluation similar to a PIA.
- ☐ No significant privacy issues (or privacy issues are unchanged).
- ☐ Other :

Applicable SORN(s): The FBI Central Records System, JUSTICE/FBI-002, published at 63 Fed. Reg. 8671 (Feb. 20, 1998), as amended at 66 Fed. Reg. 17200 (Mar. 29, 2001) and 66 Fed. Reg. 29994 (June 4, 2001).

Notify FBI RMD/RIDS per MIOG 190.2.3? ☒ No ☐ Yes--See sample EC on PCLU intranet website here: http://home/DO/OGC/LTB/PCLU/PrivacyCivil%20Liberties%20Library/form_for_miog190-2-3_ec.wpd

SORN/SORN revision(s) required? ☒ No ☐ Yes

Prepare/revise/add Privacy Act (e)(3) statements for related forms? ☐ No ☐ Yes

RECORDS. The program should consult with RMD to identify/resolve any Federal records/electronic records issues. The system may contain Federal records whether or not it contains Privacy Act requests and, in any event, a records schedule approved by the National Archives and Records Administration is necessary. RMD can provide advice on this as well as on compliance with requirements for Electronic Recordkeeping Certification and any necessary updates.

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: (a) name of the system/project, including associated acronyms; (b) structure of the system/project, including interconnections with other projects or systems; (c) purpose of the system/project; (d) nature of the information in the system/project and how it will be used; (e) who will have access to the information in the system/project; (f) and the manner of transmission to all users.

(S)

b1
b3
b7E

b7E

2. Does the system/project collect, maintain, or disseminate any information about individuals (i.e., a human being or natural person, regardless of nationality)?

☐ NO

☒ YES [If yes, please continue.]

3. Please indicate if any of the following characteristics apply to the information in the system about individuals: Bear in mind that log-on information may identify or be linkable to an individual.

(Check all that apply.)

☒ The information directly identifies specific individuals.

☒ The information is intended to be used, in conjunction with other data elements, to indirectly identify specific individuals.

☒ The information can be used to distinguish or trace an individual's identity (i.e., it is linked or linkable to specific individuals).

If you marked any of the above, proceed to Question 4.

☐ None of the above. If none of the above, describe why the information does not identify specific individuals either directly or indirectly.

4. Does the system/project pertain only to government employees, contractors, or consultants?

☒ NO ☐ YES

5. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

☐ NO [If no, skip to question 7.]

☒ YES. [If yes, proceed to the next question.]

6. Does the system/project collect any information directly from the person who is the subject of the information?

☒ NO [If no, proceed to question 7.]

☐ YES

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

_____ NO

_____ YES [If yes, proceed to question 7.]

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

_____ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

_____ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project? Full SSNs should only be used as identifiers in limited instances.

X NO _____ YES If yes, check all that apply:

_____ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

_____ SSNs are necessary to identify FBI personnel in this internal administrative system.

_____ SSNs are important for other reasons. Describe:

_____ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

_____ It is not feasible for the system/project to provide special protection to SSNs. Explain:

8. Is the system operated by a contractor?

X No.

_____ Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be imposed as a matter of Department of Justice policy. Consultations with the

Office of the General Counsel may be required if a contractor is operating the system for the FBI.

9. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

_____ NO If no, indicate reason; if C&A is pending, provide anticipated completion date:

 X YES If yes, please indicate the following, if known:

Provide date of last C&A certification/re-certification:
May 14, 2012 is currently undergoing re-certification)

b3
b7E

Confidentiality: X Low ___ Moderate ___ High ___ Undefined

Integrity: X Low ___ Moderate ___ High ___ Undefined

Availability: X Low ___ Moderate ___ High ___ Undefined

_____ Not applicable -- this system is only paper-based.

10. Does the system conduct data mining as defined in Section 804 of the Implementing Recommendations of the 9/11 Commission Act of 2007, P.L. 110-53 (codified at 42 USC 2000ee-3)?

 X NO

_____ YES If yes, please describe the data mining function:

11. Is this a national security system (as determined by the SecD)?

_____ NO

 X YES

12. Status of System/ Project:

_____ This is a new system/ project in development.

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed? 2003/2004

2. Has the system/project undergone any significant changes since April 17, 2003?

_____ NO [If no, proceed to next question (II.3).]

X YES If yes, indicate which of the following changes were involved (mark all changes that apply, and provide brief explanation for each marked change):

All the changes marked below occurred prior to the 2010 PTA and Routine Database PIA for this system.

X A conversion from paper-based records to an electronic system.

_____ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

X A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

_____ A change that results in information in identifiable form being merged, centralized, or matched with other databases.

_____ A new method of authenticating the use of and access to information in identifiable form by members of the public.

_____ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

X A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

_____ A change that results in a new use or disclosure of information in identifiable form.

X A change that results in new items of information in identifiable form being added into the system/project.

_____ Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

_____ Other [Provide brief explanation]:

3. Does a PIA for this system/project already exist?

_____ NO X YES

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: 2257 Program Pornography Producer/Performer Databases

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:

1. Type of information in the system:

The 2257 Program is responsible for conducting inspections at pornography producers' places of business to ensure their compliance with Title 18, United States Code Section 2257 (18 U.S.C. §2257) and Title 28, Code of Federal Regulations Section 75 (28 C.F.R. Part 75). The statute and corresponding regulations were enacted in an effort to prevent the sexual exploitation of children. The statute requires that records be kept by producers for certain products made after 11/01/1990, and which contain one or more visual depictions of an actual human being engaged in actual sexually explicit conduct. In general, the records required to be maintained by producers of sexually explicit material include records related to the verification of a performer's legal name and date of birth. Under the statute and regulations, producers are required to obtain the legal name and date of birth of performers by examining an appropriate picture identification card. Producers must also maintain a copy of the picture identification card that was submitted, if the product was produced after a specified date. Additionally, producers have to record any name (other than the performer's legal name) ever used by the performer, including maiden name, nickname, stage name, or professional name, and are also required to cross reference performers names with other productions made by that producer in which the performer has appeared. The regulations also require that producers affix to every product, a statement which provides the name, title and business address of the person responsible for maintaining the required records.

2257 Program field personnel responsible for conducting inspections are currently comprised of two field Supervisory Special Agents (SSAs), five retired agents ("contractors") (to be increased to eight contractors in the near future), and one part-time Support Services Technician. The producers to be inspected by 2257 Program personnel are randomly selected from a database using a random number generator algorithm. The database, named the "2257 Program Pornography Producer Database" (hereinafter "the Producer database"), will be maintained by 2257 Program personnel [REDACTED]

b7E

On-site inspections at the producer's listed place of business are conducted without advance notice to the producer as designated by the regulations. During the inspection, identification documents maintained by the producer are copied or electronically scanned by the contractors, and are then compared to —copies of facial photos of performers that were previously printed. A regulatory inspection report is subsequently issued disclosing any violations found during the on-site inspection, such as the lack of identification or the use of illegible identification. The 2257 Program has also begun to develop a database comprised of the following information for each performer identified during on-site inspections conducted pursuant to 18 U.S.C. §2257 and 28 C.F.R. Part 75: stage name, true name, date of birth [REDACTED]

b7E

[REDACTED] This database, named the "2257 Program Pornography Performer Database" (hereinafter "the Performer database") will be maintained by 2257 Program personnel [REDACTED]

For information, as indicated above, 2257 Program personnel will obtain digital copies of identification documents (e.g., driver

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: 2257 Program Pornography Producer/Performer Databases

licenses, passports, etc.) either by obtaining such digital copies directly from the producer during an on-site inspection or by scanning hard copies of documents [REDACTED]

b7E

a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

Not applicable.

2. Purpose for collecting the information and how it will be used:

The Producer database will be used to maintain a master list of all known/suspected producers of pornography, including production companies, website addresses, magazine publishers, etc. An algorithm will be utilized to randomly select production companies, website addresses, magazine publishers, etc., for inspection by the 2257 Program pursuant to 18 U.S.C. §2257 and 28 C.F.R. Part 75.

The Performer database will be used to maintain a master list of performers that 2257 Program personnel can reference for information relative to the 2257 Program and inspections pursuant to 18 U.S.C. §2257 and 28 C.F.R. Part 75. [REDACTED]

b7E

3. The system's structure (including components/subsystems):

b7E

4. Means of accessing the system and transmitting information to and from the system:

Both databases will be maintained on the same stand-alone computer maintained at the secure 2257 Program offsite in the Los Angeles Division. The databases will only be able to be accessed via the stand-alone computer by 2257 Program personnel. The stand-alone computer will not be connected to any external system, including the Internet. No mass transmission of either database will occur. [REDACTED]

b7E

[REDACTED] In addition, identifying information for a limited number of performers, including stage name, true name and date of birth, will be listed in regulatory inspection reports. [REDACTED]

b7E

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: 2257 Program Pornography Producer/Performer Databases

b7E

without having physical access to the entire Performer database, which only 2257 Program personnel will have.

b7E

and ensure the Performer database's compliance with MIOG 190-10.4, while still safeguarding the personally identifiable information from access by unauthorized personnel.

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Only personnel assigned to the secure 2257 Program offsite in the Los Angeles Division will have physical access to the databases, which will be maintained on a stand-alone computer. The stand-alone computer will not be connected to any external system, including the Internet. For information, the 2257 Program offsite is currently located in the secure Corman Federal Building, 6230 Van Nuys Boulevard, Van Nuys, California. A copy of the databases, or just certain information from the databases, may be provided to authorized personnel from CID, Violent Crimes Section, Crimes Against Children Unit, which is responsible for oversight of the 2257 Program, as well as senior FBI management, as needed for program oversight.

b7E

without having physical access to the entire database, which only 2257 Program personnel will have.

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

As stated above, only personnel assigned to the secure 2257 Program offsite in the Los Angeles Division will have physical access to the databases. Certain information from the databases may also be provided to authorized personnel from the Department of Justice who have responsibilities related to the 2257 Program, but they would not be able to directly access the system themselves. This would include Assistant United States Attorneys assigned to review regulatory inspection reports or prosecute criminal cases referred by 2257 Program personnel. If there is a prosecution related to violations of 18 U.S.C. §2257, information in the database may become relevant to the proceedings and could be disclosed as necessary.

7. Has this system been certified and accredited by the FBI Security Divisions? ☐ Yes ☒ No

**** Program to contact ISSM to ascertain if C&A required, and if so, initiate process to obtain C&A. -DCL**

8. Is this system encompassed within an OMB-300? ☐ Yes ☐ No ☒ Don't Know

(If yes, please attach copy of latest one.)

I. Was the system developed prior to April 17, 2003?

☐ YES (If "yes," proceed to Question 1.)

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: 2257 Program Pornography Producer/Performer Databases

☒ **NO** (If "no," proceed to Section II.)

1. Has the system undergone any significant changes since April 17, 2003?

☐ **YES** If "yes," please explain the nature of those changes:

(Continue to Question 2.)

☐ **NO** (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Do the changes involve the collection, maintenance, or dissemination of information in identifiable form about individuals?

☐ **YES** (If "yes," please proceed to Question 3.)

☐ **NO** (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Does the system collect, maintain or disseminate information in identifiable form about individuals?

☐ **YES** (If "yes," please proceed to Question 3.)

☐ **NO** (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

☐ **YES** If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

☐ **Yes.** (If "yes," a full PIA is required.. PTA is complete.)

☐ **No.** (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

☐ **NO** (If "no," go to section III to determine if a full or short-form PIA is required.)

III. Full or Short-Form PIA

1. Is the system a major information system (as listed on OGC's FBINET website)?

☐ **YES** (If "yes," a full PIA is required. PTA is complete.)

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

(OGC/PCLU (Rev. 07/06/07))

NAME OF SYSTEM: **b7E**

___NO (If "no," please continue to question 2.)

2. Does the system involve routine information AND have limited use/access?

___YES A short-form PIA is required. (I.e., you need only answer Questions 1.1, 1.2, 2.1, 3.1, 4.1, 5.1 (if appropriate), 6.2, 6.3, and 8.9 of the PIA template.) Please note that FBI and DOJ reviewing officials reserve the right to require completion of a full PIA. (PTA is complete---forward with PIA.)

___NO (If "no," a full PIA is required. PTA is complete.)

FBI PTA:

b7E

FINAL FBI APPROVAL / DETERMINATIONS / CONDITIONS: [This section will be completed by the FBI PCLU/PCLO following PTA submission. The PTA drafter should skip to the next page and continue.]

☐ PIA is required by the E-Government Act.

☐ PIA is to be completed as a matter of FBI/DOJ discretion.

Is PIA to be published on FBI.GOV (after any RMD FOIA redactions)? ☐ Yes. ☐ No (indicate reason):

☒ PIA is not required for the following reason(s):

☒ System does not collect, maintain, or disseminate PII.

☐ System is grandfathered (in existence before 4/17/2003; no later changes posing significant privacy risks).

☐ Information in the system relates to internal government operations.

☐ System has been previously assessed under an evaluation similar to a PIA.

☐ No significant privacy issues (or privacy issues are unchanged).

☐ Other (describe):

Applicable SORN(s):

Notify FBI RMD/RIDS per MIOG 190.2.3? ☐ No ☐ Yes (see sample EC on PCLU intranet website).

SORN/SORN revision(s) required? ☐ No ☐ Yes (indicate revisions needed):

Prepare/revise/add Privacy Act (e)(3) statements for related forms? ☐ No ☐ Yes (indicate forms affected):

RECORDS. The program should consult with RMD to identify/resolve any Federal records/electronic records issues. The system may contain Federal records whether or not it contains Privacy Act requests and, in any event, a records schedule approved by the National Archives and Records Administration is necessary. RMD can provide advice on this as well as on compliance with requirements for Electronic Recordkeeping Certification and any necessary updates.

FBI Privacy and Civil Liberties Officer

Signature: David C. Larson
Date Signed: 07/28/09

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users.

b7E

The FBI will be responsible for ensuring that only authenticated users can access the system, in order to meet continuity of operations requirements. The security features of will be approved by the Security Division before it becomes operational.

2. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

XX NO. [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

___ YES. [If yes, please continue.]

3. Does the system/project pertain only to government employees, contractors, or consultants?

___ NO. ___ YES.

4. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

___ NO. ___ YES.

5. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project?

___ NO. ___ YES. If yes, check all that apply:

___ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses

FBI PTA:

b7E

or sources in this law enforcement or intelligence activity.

____ SSNs are necessary to identify FBI personnel in this internal administrative system.

____ SSNs are important for other reasons. **Describe:**

____ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). **Describe:**

____ It is not feasible for the system/project to provide special protection to SSNs. **Explain:**

6. Does the system/project collect any information directly from the person who is the subject of the information?

____ NO. [If no, proceed to question 7.]

____ YES.

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

____ YES. [If yes, proceed to question 7.]

____ NO.

b. Are subjects of information from whom the information is directly collected provided a written statement (either on the collection form or via a separate notice)? Privacy Act (e)(3)

____ NO. [The program will need to work with PCLU to develop/implement the necessary form(s).]

____ YES. **Identify any forms, paper or electronic, used to request such information from the information subject:**

7. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

____ NO. **If no, indicate reason; if C&A is pending, provide anticipated completion date:**

____ YES. **If yes, provide date of last C&A certification/re-certification:**

____ Don't Know.

8. Is this system/project the subject of an OMB-300 budget submission?

____ NO.

____ Don't know.

____ YES. **If yes, please provide the date and name or title of the OMB submission:**

9. Is this a national security system (as determined by the SecD)?

____ NO.

____ YES.

____ Don't know.

FBI PTA:

b7E

10. Status of System/ Project:

☐ This is a new system/ project in development. [If you checked this block, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required .]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

☐ NO. [If no, proceed to next question (II.3).]

☐ YES. If yes, indicate which of the following changes were involved (mark all boxes that apply):

☐ A conversion from paper-based records to an electronic system.

☐ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

☐ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

☐ A change that results in information in identifiable form being merged, centralized, or matched with other databases.

☐ A new method of authenticating the use of and access to information in identifiable form by members of the public.

☐ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

☐ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

☐ A change that results in a new use or disclosure of information in identifiable form.

☐ A change that results in new items of information in identifiable form being added into the system/project.

☐ Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

☐ Other. [Provide brief explanation]:

3. Does a PIA for this system/project already exist? ☐ NO. ☐ YES. If yes:

a. Provide date/title of the PIA:

[INSERT CLASSIFICATION/CONTROL MARKINGS, IF APPROPRIATE]

FBI PTA:

b7E

- b. Has the system/project undergone any significant changes since the PIA? ☐ NO. ☐ YES.

[The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM:

b7E

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:

1. Type of information in the system:

b7E

a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

b7E

2. Purpose for collecting the information and how it will be used:

b7E

3. The system's structure (including components/subsystems):

b7E

There have been no significant changes to it since 2003. No PIA was done (because it was grandfathered under the E-Government Act). No significant changes are being proposed that would involve personally identifiable information.

4. Means of accessing the system and transmitting information to and from the system:

b7E

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Only a limited number of system personnel (e.g., Network Management personnel, EOC operators, Security Division auditors, ISSOs, and ISSMs, etc.) have access

b7E

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM:

b7E

security purposes.

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

No one outside the FBI unless authorized by both ITOD and the Security Division

7. Has this system been certified and accredited by the FBI Security Divisions? ☒ Yes ☐ No

8. Is this system encompassed within an OMB-300? ☒ Yes ☐ No ☐ Don't Know
(if yes, please attach copy of latest one.)

I. Was the system developed prior to April 17, 2003?

☒ YES (If "yes," proceed to Question 1.)

☐ NO (If "no," proceed to Section II.)

1. Has the system undergone any significant changes since April 17, 2003?

☐ YES If "yes," please explain the nature of those changes:

(Continue to Question 2.)

☒ NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Do the changes involve the collection, maintenance, or dissemination of information in identifiable form about individuals?

☐ YES (If "yes," please proceed to Question 3.)

☐ NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

☐ YES If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

☐ Yes. (If "yes," a full PIA is required.. PTA is complete.)

☒ No. (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM:

b7E

☐ NO (If "no," go to section III to determine if a full or short-form PIA is required.)

II. For systems developed after April 17, 2003.

1. What is the purpose of the system? (Answer in detail unless details already provided in A. 2 above):

(Continue to Question 2.)

2. Does the system collect, maintain or disseminate information in identifiable form about individuals?

☐ YES (If "yes," please proceed to Question 3.)

☐ NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

☐ YES If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

☐ Yes. (If "yes," a full PIA is required.. PTA is complete.)

☐ No. (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

☐ NO (If "no," go to section III to determine if a full or short-form PIA is required.)

III. Full or Short-Form PIA

1. Is the system a major information system (as listed on OGC's FBINET website)?

☐ YES (If "yes," a full PIA is required. PTA is complete.)

☐ NO (If "no," please continue to question 2.)

2. Does the system involve routine information AND have limited use/access?

☐ YES A short-form PIA is required. (I.e., you need only answer Questions 1.1, 1.2, 2.1, 3.1, 4.1, 5.1 (if appropriate), 6.2, 6.3, and 8.9 of the PIA template.) Please note that FBI and DOJ reviewing officials reserve the right to require completion of a full PIA.

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

(OGC/PCLU (Rev. 07/06/07))

NAME OF SYSTEM: **Bank Robbery Statistical Application**

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

Whether or not a PIA is required, the system owner/program manager should consult with the FBI Records Management Division (RMD) to identify and resolve any records issues relating to information in the system.

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:

The Bank Robbery Statistical Application (BRSA) is a mainframe application that serves as the repository for all statistical data reported on the FD-430 Form

1. Type of information in the system:

Bank Crime Statistics

a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

2. Purpose for collecting the information and how it will be used:

Bank Crime Statistical reports

3. The system's structure (including components/subsystems):

Database Management System [ADABAS/Natural]

4. Means of accessing the system and transmitting information to and from the system:

FBI Investigative Mainframe

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Only customers that have access to FBINET may have access to BRSA.

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Only customers that have access to FBINET may have access to BRSA.

7. Has this system been certified and accredited by the FBI Security Divisions? X Yes No

8. Is this system encompassed within an OMB-300? X Yes No Don't

Know

(if yes, please attach copy of latest one:..SORRY, I do not have a copy of the latest one)

I. Was the system developed prior to April 17, 2003?

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

(OGC/PCLU (Rev. 07/06/07))

NAME OF SYSTEM: **Bank Robbery Statistical Application**

 X YES (If "yes," proceed to Question 1.)
 NO (If "no," proceed to Section II.)

1. Has the system undergone any significant changes since April 17, 2003?

 YES If "yes," please explain the nature of those changes:

(Continue to Question 2.)

 X NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Do the changes involve the collection, maintenance, or dissemination of information in identifiable form about individuals?

 YES (If "yes," please proceed to Question 3.)

 NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

 YES If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

 Yes. (If "yes," a full PIA is required.. PTA is complete.)

 No. (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

 NO (If "no," go to section III to determine if a full or short-form PIA is required.)

II. For systems developed after April 17, 2003.

1. What is the purpose of the system? (Answer in detail unless details already provided in A. 2 above):

(Continue to Question 2.)

2. Does the system collect, maintain or disseminate information in identifiable form about individuals?

 YES (If "yes," please proceed to Question 3.)

 NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval,

NAME OF SYSTEM: **Bank Robbery Statistical Application**

and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

___ YES If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

___ Yes. (If "yes," a full PIA is required.. PTA is complete.)

___ No. (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

___ NO (If "no," go to section III to determine if a full or short-form PIA is required.)

III. Full or Short-Form PIA

1. Is the system a major information system (as listed on OGC's FBINET website)?

___ YES (If "yes," a full PIA is required. PTA is complete.)

___ NO (If "no," please continue to question 2.)

2. Does the system involve routine information AND have limited use/access?

___ YES A short-form PIA is required. (I.e., you need only answer Questions 1.1, 1.2, 2.1, 3.1, 4.1, 5.1 (if appropriate), 6.2, 6.3, and 8.9 of the PIA template.) Please note that FBI and DOJ reviewing officials reserve the right to require completion of a full PIA. (PTA is complete—forward with PIA.)

___ NO (If "no," a full PIA is required. PTA is complete.)

FBI DIVISION APPROVALS. A PIA (and/or PTA) should be prepared/approved by the cognizant program management in collaboration with IT, security, and end-user management and OGC/PCLU. (PIAs/PTAs relating to electronic forms/questionnaires implicating the Paperwork Reduction Act should also be coordinated with the RMD Forms Desk.) If the subject of a PTA/PIA is under the program cognizance of an FBIHQ Division, prior to forwarding to OGC the PTA/PIA must also be referred to the FBIHQ Division for program review and approval, if required by the FBIHQ Division.

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

(OGC/PCLU (Rev. 07/06/07))

NAME OF SYSTEM:

b7E

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

Whether or not a PIA is required, the system owner/program manager should consult with the FBI Records Management Division (RMD) to identify and resolve any records issues relating to information in the system.

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:**b7E**

1. Type of information in the system:

b7E

a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

2. Purpose for collecting the information and how it will be used:

The information provided by the**b7E****exists in the field divisions.**

3. The system's structure (including components/subsystems):

b7E

4. Means of accessing the system and transmitting information to and from the system:

FBI Administrative Mainframe

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Members of the various**units, bureau-wide.****b7E**

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

No One.

7. Has this system been certified and accredited by the FBI Security Divisions? ☒ Yes ☐ No

8. Is this system encompassed within an OMB-300? ☒ Yes ☐ No ☐ Don't Know

(If yes, please attach copy of latest one: SORRY, I do not have a copy of the latest one.)

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

(OGC/PCLU (Rev. 07/06/07))

NAME OF SYSTEM:

b7E

I. Was the system developed prior to April 17, 2003?

 X YES (If "yes," proceed to Question 1.)

 NO (If "no," proceed to Section II.)

1. Has the system undergone any significant changes since April 17, 2003?

 YES If "yes," please explain the nature of those changes:

(Continue to Question 2.)

 X NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Do the changes involve the collection, maintenance, or dissemination of information in identifiable form about individuals?

 YES (If "yes," please proceed to Question 3.)

 NO (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

 YES If "yes," is this a Major Information System (as listed on OGC's FBINET website)?:

 Yes. (If "yes," a full PIA is required.. PTA is complete.)

 No. (If "no," the PTA is complete and should be sent to FBI OGC's Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ's Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

 NO (If "no," go to section III to determine if a full or short-form PIA is required.)

II. For systems developed after April 17, 2003.

1. What is the purpose of the system? (Answer in detail unless details already provided in A. 2 above):

(Continue to Question 2.)

2. Does the system collect, maintain or disseminate information in identifiable form about individuals?

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Name of the system/project. Provide current name, any previous or anticipated name changes, and any associated acronyms:

b7E

2. Briefly describe the system's/project's structure (including identification of any components/subsystems or parent system, if applicable):

b7E

3. What is the purpose for the system/project?

b7E

4. Please provide a general summary of the nature of information in the system/project and how it will be used:

b7E

5. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

☒ NO. **Stop. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.**

☐ YES. If yes, please continue.

6. Access

a. Describe the means of accessing the system/project and transmitting information to and from the system/project:

b. Describe who within the FBI will have access to the information in the system and the controls for ensuring that only authorized persons can access the information:

c. Describe who outside the FBI will have access to the information in the system/project and the controls for ensuring that only authorized persons can access the information:

7. Does the system/project pertain only to government employees, contractors, or consultants?

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM / PROJECT:

b7E

___ NO

___ YES. If yes, provide a brief explanation of the quantity and type of information:

8. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

___ NO

___ YES

9. Are Social Security Numbers collected, maintained or disseminated from the system/project?

___ NO

___ YES. If yes, for systems/projects **other than** those supporting law enforcement or intelligence activities:

- What is the purpose for the collection, maintenance or dissemination of SSNs?

- Is it feasible to eliminate SSNs from the system/project (please indicate why or why not)?

- In light of Federal policy to reduce the use of SSNs, is it feasible to minimize system/project-user access to SSNs in the system/project (why or why not)?

10. Does the system/project collect any information directly from the person who is the subject of the information?

___ NO

___ YES. If yes, for systems/projects **other than** those relating to criminal investigations, CT, or CI:

- Indicate how such information is collected:

- Identify by name and form number any forms used to request such information from the information subject (this includes paper or electronic forms):

- Are information subjects from whom information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)? ___ Yes ___ No

11. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

___ NO. If no, please indicate reason; if C&A is pending, provide anticipated completion date:

___ YES. If yes, please:

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM / PROJECT: **b7E**

- Provide date of last C&A certification/re-certification:

12. Is this system/project the subject of an OMB-300 budget submission?

NO Don't know

YES. If yes, if the name of the OMB 300 is not the same as the name of the system/project, please provide OMB name:

13. Is this a national security system (as determined by the SecD)?

NO YES Don't know

14. Status of System/ Project:

This is a new system/ project in development. **[Stop. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required .]**

This is an existing system/project. [Continue to Section II.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

NO. If no, proceed to next question (II.3).

YES. If yes, indicate which of the following changes were involved **(mark all boxes that apply):**

A conversion from paper-based records to an electronic system.

A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM / PROJECT: b7E

- ☐ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)
- ☐ A change that results in information in identifiable form being merged, centralized, or matched with other databases.
- ☐ A new method of authenticating the use of and access to information in identifiable form by members of the public.
- ☐ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.
- ☐ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.
- ☐ A change that results in a new use or disclosure of information in identifiable form.
- ☐ A change that results in new items of information in identifiable form being added into the system/project.
- ☐ Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.
- ☐ Other. [Please provide brief explanation]:

3. Does a PIA for this system/project already exist?

☐ NO

☐ YES. If yes, please provide date/title of the PIA:

The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required .

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users. (This kind of information may be available in the System Security Plan, if available, or from a Concept of Operations document, and can be cut and pasted here.):

Digital Collection System 3000 (DCS 3000) is an electronic surveillance (ELSUR) collection system supporting the FBI's use of Pen Registers in both criminal investigations and FISA investigations. A Pen Register, sometimes called a dialed number recorder, is a device that records the numbers dialed from a specific telephone numbers. [REDACTED]
[REDACTED] DCS 3000 [REDACTED]
[REDACTED] provides the FBI with a digital collection system for authorized wired and wireless communication pen registers.

b7E

b7E

DCS 3000 is deployed in central monitoring points throughout the FBI. The system is currently operating under an existing certification and accreditation dated June 12, 2006. Continued authority to operate (ATO) has been granted pending re-certification and accreditation.

1. Type of information in the system: The DCS 3000 system [REDACTED]

b7E

2. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

_____ NO. [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

UNCLASSIFIED//FOR OFFICIAL USE ONLY

UNCLASSIFIED//FOR OFFICIAL USE ONLY
Digital Collection System (DCS) 3000

☒ YES. [If yes, please continue.]

DCS 3000 contains specific telephone numbers [redacted]

[redacted] of wired and wireless telecommunications devices for which ELSUR (in the form of Pen Registers) has been authorized by an appropriate judicial officer. In addition, DCS 3000 [redacted]

b7E

3. Does the system/project pertain only to government employees, contractors, or consultants?

☒ NO. ☐ YES.

4. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

☐ NO. ☒ YES.

While DCS 3000 contains [redacted] telephone numbers of individuals who are the target of court authorized ELSUR in the form of pen registers, [redacted]

b7E

[redacted] DCS 3000 [redacted]

5. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project?

☒ NO. ☐ YES. If yes, check all that apply:

☐ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

☐ SSNs are necessary to identify FBI personnel in this internal administrative system.

☐ SSNs are important for other reasons. Describe:

☐ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

☐ It is not feasible for the system/project to provide special protection to SSNs.
Explain:

6. Does the system/project collect any information directly from the person who is the subject of the information?

☐ NO. [If no, proceed to question 7.]

UNCLASSIFIED//FOR OFFICIAL USE ONLY

UNCLASSIFIED//FOR OFFICIAL USE ONLY
Digital Collection System (DCS) 3000

X YES.

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

X YES. [If yes, proceed to question 7.]

_____ NO.

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

_____ NO. [The program will need to work with PCLU to develop/implement the necessary form(s).]

_____ YES. Identify any forms, paper or electronic, used to request such information from the information subject:

Prior notice to the individual target is not required as the *ex parte* collection of Pen Register data by DCS 3000 has been judicially authorized. To the extent that the Pen Registers are used in support of a criminal investigation, notice to the target is normally provided, pursuant to 18 U.S.C. § 2518(8)(d), within ninety days of the commencement of the surveillance. A judicial officer may postpone such notice for good cause.

In the case of Pen Registers authorized by the Foreign Intelligence Surveillance Act (FISA), 50 U.S.C. §§ 1801 *et seq.*, notice is unnecessary as the *ex parte* collection of telephone data is authorized pursuant to 50 U.S.C. § 1842. In the event that data collected pursuant to FISA is to be used as evidence or otherwise disclosed, notice must be given to the person whose telephone was the subject of the FISA warrant.

7. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

_____ NO. If no, indicate reason; if C&A is pending, provide anticipated completion date:

X YES. If yes, provide date of last C&A certification/re-certification:

DCS 3000 was originally certified and accredited by the FBI's Security Division on June 12, 2006. Updated ATO through May 15, 2010 has been granted by the FBI's Security Division.

8. Is this system/project the subject of an OMB-300 budget submission?

_____ NO.

_____ Don't know.

X YES. If yes, please provide the date and name or title of the OMB submission:

UNCLASSIFIED//FOR OFFICIAL USE ONLY

UNCLASSIFIED//FOR OFFICIAL USE ONLY
Digital Collection System (DCS) 3000

The FBI's entire Digital Collection System, including DCS 3000, is the subject of an FY 2010 Exhibit 300 dated April 25, 2008.

9. Is this a national security system (as determined by the SecD)?

☒ NO. ☐ YES. ☐ Don't know.

10. Status of System/ Project:

☐ This is a new system/ project in development. [If you checked this block, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed? DCS-3000 has been operational and deployed at multiple FBI field offices A PTA for DCS 3000 was previously completed in June 2006. At that time, it was determined that DCS 3000 was a "grandfathered" system so that no PIA was necessary.

b7E

2. Has the system/project undergone any significant changes since April 17, 2003?

☐ NO. [If no, proceed to next question (II.3).]

☒ YES. If yes, indicate which of the following changes were involved (mark all boxes that apply):

☐ A conversion from paper-based records to an electronic system.

☐ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

☐ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

☐ A change that results in information in identifiable form being merged, centralized, or matched with other databases.

☐ A new method of authenticating the use of and access to information in identifiable form by members of the public.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

UNCLASSIFIED//FOR OFFICIAL USE ONLY
Digital Collection System (DCS) 3000

- _____ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.
- _____ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.
- _____ A change that results in a new use or disclosure of information in identifiable form.
- _____ A change that results in new items of information in identifiable form being added into the system/project.
- X Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

The only changes to DCS 3000 since it first became operational involve hardware replacement and security software upgrades that do not affect the collection, maintenance or dissemination of PII.

_____ Other. [Provide brief explanation]:

3. Does a PIA for this system/project already exist? X NO. _____ YES. If yes:

a. Provide date/title of the PIA:

b. Has the system/project undergone any significant changes since the PIA? _____ NO. _____ YES.

A PIA for DCS 3000 was completed in June 2006, at which time a determination was made that no PIA was required as the system was grandfathered under the E-Government Act. There have been no significant changes to DCS 3000 affecting PII since that PIA.

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users. (This kind of information may be available in the System Security Plan, if available, or from a Concept of Operations document, and can be cut and pasted here.):

DCS 5000 provides the FBI with a digital collection system for a variety of Electronic Surveillance (ELSUR) information collected pursuant to the Foreign Intelligence Surveillance Act (FISA) as authorized by a judicial officer. DCS 5000 contains information collected from digital and analog telephones, facsimile machines and microphones. DCS 5000 [REDACTED]
DCS 3000.

b3
b7E

DCS 5000 enables the FBI to monitor, exploit, and disseminate intelligence collected by ELSUR in a collaborative environment among linguists, case agents, and case managers. DCS 5000 provides these services both at FBI Field Offices and at FBIHQ.

[REDACTED]

b3
b7E

[REDACTED]

b3
b7E

In support of national security investigations, DCS 5000 collects and maintains the following types of information pursuant to authorization from the FISA court:

- a. voice data recorded from telephone calls or overheard by surveillance microphones;

[REDACTED]

UNCLASSIFIED//FOR OFFICIAL USE ONLY
FBI PTA : Digital Collection System (DCS) 5000

5. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project?

☒ NO. ☐ YES. If yes, check all that apply:

☐ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

☐ SSNs are necessary to identify FBI personnel in this internal administrative system.

☐ SSNs are important for other reasons. Describe:

☐ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

☐ It is not feasible for the system/project to provide special protection to SSNs. Explain:

6. Does the system/project collect any information directly from the person who is the subject of the information?

☐ NO. [If no, proceed to question 7.]

☒ YES.

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

☒ YES. [If yes, proceed to question 7.]

☐ NO.

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

☐ NO. [The program will need to work with PCLU to develop/implement the necessary form(s).]

☐ YES. Identify any forms, paper or electronic, used to request such information from the information subject:

UNCLASSIFIED//FOR OFFICIAL USE ONLY

UNCLASSIFIED//FOR OFFICIAL USE ONLY

Prior notice to an individual target of ELSUR is unnecessary as the collection of voice data [redacted]
[redacted] by DCS 5000 has been judicially authorized. [redacted]

b3
b7E

7. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

_____ NO. If no, indicate reason; if C&A is pending, provide anticipated completion date:

 X YES. If yes, provide date of last C&A certification/re-certification:

DCS 5000 was recently re-certified and accredited by the Security Division and was granted authority to operate on February 18, 2009.

8. Is this system/project the subject of an OMB-300 budget submission?

_____ NO. _____ Don't know. X YES. If yes, please provide the date and name or title of the OMB submission:

The FBI's entire Digital Collection System, including DCS 5000, is the subject of an FY 2010 Exhibit 300 dated April 25, 2008.

9. Is this a national security system (as determined by the SecD)?

_____ NO. X YES. _____ Don't know.

10. Status of System/ Project:

_____ This is a new system/ project in development.

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed? DCS-5000 has been operational at multiple FBI field offices

EPIC-552

~~SECRET//NOFORN~~
UNCLASSIFIED//FOUO WHEN REMOVED FROM ATTACHED PTA

~~_____~~ YES. [If yes, proceed to the next question.]

6. Does the system/project collect any information directly from the person who is the subject of the information?

_____ NO [If no, proceed to question 7.]

_____ YES

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

_____ NO

_____ YES [If yes, proceed to question 7.]

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

_____ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

_____ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project? Full SSNs should only be used as identifiers in limited instances.

_____ NO _____ YES If yes, check all that apply:

_____ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

_____ SSNs are necessary to identify FBI personnel in this internal administrative system.

_____ SSNs are important for other reasons. Describe:

_____ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

~~SECRET//NOFORN~~
UNCLASSIFIED//FOUO WHEN REMOVED FROM ATTACHED PTA

_____ It is not feasible for the system/project to provide special protection to SSNs. Explain:

8. Is the system operated by a contractor?

_____ No.

_____ Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be imposed as a matter of Department of Justice policy. Consultations with the Office of the General Counsel may be required if a contractor is operating the system for the FBI.

9. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

_____ NO If no, indicate reason; if C&A is pending, provide anticipated completion date:

_____ YES If yes, please indicate the following, if known:

Provide date of last C&A certification/re-certification:

Confidentiality: ___Low___Moderate___High___Undefined

Integrity: ___Low___Moderate___High___Undefined

Availability: ___Low___Moderate___High___Undefined

_____ Not applicable -- this system is only paper-based.

10. Is this system/project the subject of an OMB-300 budget submission?

_____ NO

_____ YES If yes, please provide the date and name or title of the OMB submission:

11. Does the system conduct data mining as defined in Section 804 of the Implementing Recommendations of the 9/11 Commission Act of 2007, P.L. 110-53?

_____ NO

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users.

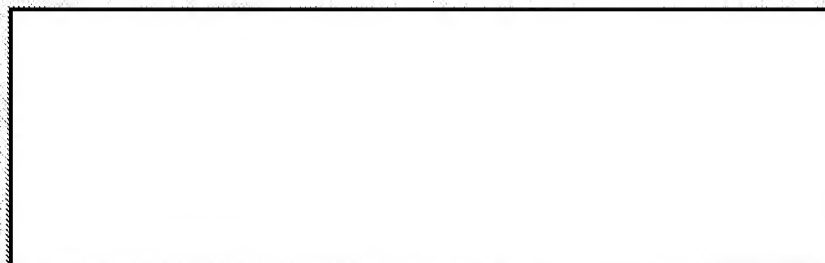

The Special Technologies and Applications Office (STAO) has been tasked to engineer a program with the overall goal of making major improvements in data accessibility, search capabilities, and analysis across extant FBI, Intelligence Community (IC), Law Enforcement (LE), and public applications and data stores. The proposed project name for this effort and major application is the Data Integration and Visualization System (DIVS).

The primary function of the Data Integration and Visualization System (DIVS) is to support and enhance the analysis and presentation capabilities of data maintained in support of the FBI's multifaceted missions.

Essentially, the application will not be the single or primary repository for data but rather a tool enabling access, search, and analytics across multiple existing data sources.

The development and deployment plan includes more than one operating capability release. The scope of this PTA is limited to the initial operating capability with an anticipated release date of October 1, 2010. Future increments of the project will address enhancing analytical capabilities provided by the major application and the aggregation of additional data sources from other FBI law enforcement and intelligence systems and applications.

DIVS will be managed by the FBI Special Technologies and Applications Office (STAO). STAO will report directly to the ADD Chairman of the Data Exploitation and Aggregation Group (DEAG) for direction and authority regarding this project. STAO will lead the first step of DIVS by coding legal controls and integrating the many data sources and types into a common major application for viewing and presentation. STAO will begin by addressing ten data sources, as identified by NSB, to develop a logical path toward developing an integrated search and analysis capability. The following data sources will be consolidated and searchable through the DIVS major application by September 30, 2010:

b3
b7E

UNCLASSIFIED//FOUO

EPIC-147

2. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

_____ NO [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

X YES [If yes, please continue.]

3. Does the system/project pertain only to government employees, contractors, or consultants?

X NO _____ YES

4. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

_____ NO X YES

5. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project?

_____ NO X YES If yes, check all that apply:

X SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

_____ SSNs are necessary to identify FBI personnel in this internal administrative system.

_____ SSNs are important for other reasons. Describe:

_____ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

X It is not feasible for the system/project to provide special protection to SSNs. Explain: Since this system pulls data directly from other systems, it is unable to provide special protection to all SSNs.

6. Does the system/project collect any information directly from the person who is the subject of the information?

☒ NO [If no, proceed to question 7.]

☐ YES

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

☒ YES [If yes, proceed to question 7.]

☐ NO

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

Not Applicable

☐ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

☐ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

☒ NO If no, indicate reason: if C&A is pending, provide anticipated completion date: The Special Technologies and Applications Office (STAO) development of this major application is being performed on TACNet which is an existing STAO system. TACNet was granted a three year approval to operate on March 22, 2009, and the ATO expiration is March 22, 2012. This project will require certification and accreditation as a major application. Certification and accreditation activities for this major application are projected to be completed by September 30, 2010.

☐ YES If yes, provide date of last C&A certification/re-certification:

☐ Don't Know.

8. Is this system/project the subject of an OMB-300 budget submission?

☐ NO

☐ Don't know

☒ YES If yes, please
provide the date and name or title
of the OMB submission: Data
Integration and Visualization System
3/26/2009

9. Is this a national security system (as determined by the SecD)?

☐ NO

☒ YES

☐ Don't know

10. Status of System/Project:

☒ This is a new system/ project in development. [If you checked this block,
STOP. The PTA is now complete and after division approval(s) should be
submitted to FBI OGC/PCLU for final FBI approval and determination if
PIA and/or other actions are required.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

☐ NO [If no, proceed to next question (II.3).]

☐ YES If yes, indicate which of the following changes were involved (mark all
boxes that apply):

☐ A conversion from paper-based records to an electronic system.

☐ A change from information in a format that is anonymous or non-
identifiable to a format that is identifiable to particular individuals.

☐ A new use of an IT system/project, including application of a new
technology, that changes how information in identifiable form is managed.
(For example, a change that would create a more open environment and/or
avenue for exposure of data that previously did not exist.)

☐ A change that results in information in identifiable form being
merged, centralized, or matched with other databases.

UNCLASSIFIED//FOUO

_____ A new method of authenticating the use of and access to information in identifiable form by members of the public.

_____ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

_____ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

_____ A change that results in a new use or disclosure of information in identifiable form.

_____ A change that results in new items of information in identifiable form being added into the system/project.

_____ Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

_____ Other [Provide brief explanation]:

3. Does a PIA for this system/project already exist?

_____ NO _____ YES

If yes:

a. Provide date/title of the PIA:

b. Has the system/project undergone any significant changes since the PIA?

_____ NO _____ YES

[The PIA is now complete and after division approval(s) should be submitted to FBI OCC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: (a) name of the system/project, including associated acronyms; (b) structure of the system/project, including interconnections with other projects or systems; (c) purpose of the system/project; (d) nature of the information in the system/project and how it will be used; (e) who will have access to the information in the system/project; (f) and the manner of transmission to all users.

The FBI is developing and deploying an Oracle-based application, [REDACTED]

[REDACTED] to replace the existing [REDACTED]

b7E

The primary tool used within the FBI to measure the availability and expenditure of requisition-related funds is the *spend plan*. In practical terms, a spend plan may be envisioned as a checking account, upon which individual requisitions (or "checks") are drawn. In order for a requisition to pass through ITB's Financial Management Unit (FMU – the equivalent of the "bank"), sufficient funding must be available to cover the cost of the requisition.

Spend plans are generated at a unit level as *spend plan requests* identifying specific financial needs, such as the purchase of IT hardware, software or use license. Spend plan requests include a description of the item to be purchased, the funds required to purchase the item and certain financial and programmatic data. The unit submitting a spend plan request enters this information into the Financial Management System (FMS), a major FBI FISMA application supporting the management of FBI business and personnel financial records. [REDACTED]

b7E

[REDACTED] will contain (as does [REDACTED] presently) limited personally identifiable information (PII) about individuals. [REDACTED]

b7E

[REDACTED] of the data contained in FMS.

b7E

FBI PTA: [REDACTED]

b7E

While [REDACTED] will be deployed through FBINET/Secret Enclave, access will be restricted to authorized users and system administrators. Each user's privileges will be governed either by the cost code of the unit to which they are assigned or their overall level of responsibility within ITB. [REDACTED]

b7E

2. Does the system/project collect, maintain, or disseminate any information about individuals (i.e., a human being or natural person, regardless of nationality)?

 NO [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

 X YES [If yes, please continue.]

3. Please indicate if any of the following characteristics apply to the information in the system about individuals: Bear in mind that log-on information may identify or be linkable to an individual.
(Check all that apply.)

 X The information directly identifies specific individuals.

 The information is intended to be used, in conjunction with other data elements, to indirectly identify specific individuals.

 X The information can be used to distinguish or trace an individual's identity (i.e., it is linked or linkable to specific individuals).

If you marked any of the above, proceed to Question 4.

 None of the above. If none of the above, describe why the information does not identify specific individuals either directly or indirectly.

4. Does the system/project pertain only to government employees, contractors, or consultants?

 NO X YES

FBI PTA:

b7E

5. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

☐ NO [If no, skip to question 7.]

☒ YES [If yes, proceed to the next question.]

6. Does the system/project collect any information directly from the person who is the subject of the information?

☒ NO [If no, proceed to question 7.]

☐ YES

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

☐ NO

☐ YES [If yes, proceed to question 7.]

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

☐ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

☐ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project? Full SSNs should only be used as identifiers in limited instances.

☒ NO ☐ YES If yes, check all that apply:

☐ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

☐ SSNs are necessary to identify FBI personnel in this internal administrative system.

FBI PTA:

b7E

_____ SSNs are important for other reasons. Describe:

_____ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

_____ It is not feasible for the system/project to provide special protection to SSNs. Explain:

8. Is the system operated by a contractor?

☒ No.

_____ Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be imposed as a matter of Department of Justice policy. Consultations with the Office of the General Counsel may be required if a contractor is operating the system for the FBI.

9. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

will not be separately accredited. It resides, as an application, on the administrative mainframe and is encompassed in the C&A for the FBI's Administrative Mainframe Applications (AMA). The following information pertains to AMA.

b7E

_____ NO If no, indicate reason; if C&A is pending, provide anticipated completion date:

☒ YES If yes, please indicate the following, if known:

AMA was re-accredited on July 26, 2009 and has Authority to Operate (ATO) through July 25, 2012.

Provide date of last C&A certification/re-certification:

Confidentiality: Low Moderate ☒High Undefined

Integrity: Low Moderate ☒High Undefined

Availability: Low ☒Moderate High Undefined

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users. (This kind of information may be available in the System Security Plan, if available, or from a Concept of Operations document, and can be cut and pasted here.):

The Enterprise Security Operations Center (ESOC) provides the FBI with the ability to conduct real-time monitoring and security analysis of FBI Information Technology (IT) systems.¹ ESOC is designed to detect and deter IT activity that may be associated with espionage. [REDACTED]

[REDACTED]

b3
b7E

ESOC is composed of [REDACTED] that provide detection and analysis of system intrusions and misuse on monitored systems throughout the FBI enterprise. [REDACTED]

[REDACTED]

b3
b7E

The data in ESOC consists of metadata about computer usage within the FBI.² This data originates in individual FBI IT systems. The metadata includes general system information as well as information about specific IT transactions, although the precise data in ESOC is **CLASSIFIED**.

Only a limited number of FBI personnel, assigned to enterprise security at FBI Headquarters, have direct access to ESOC data. One group of analysts monitors network activity, while a second group of analysts conducts specific analysis of metadata searching for patterns of IT behavior suggesting illegal or improper use of FBI IT systems. Within enterprise security, access to ESOC utilizes role-based access, based on need-to-know principles. System administrators perform administrative tasks (such as granting user access) but cannot conduct searches or analysis. Users with an appropriate need-to-know may conduct searches or analysis, but are unable to perform administrator tasks.

¹ ESOC is the acronym for both the FBI's enterprise security operations center, as well as the analysis conducted by the center to detect illegal or improper use of FBI IT systems. As used in the PTA, ESOC refers to the analytic process employed by the security center.

² Metadata is structured information that describes, explains, locates, or otherwise makes it easier to retrieve, use or manage an IT resource. Because metadata consists of information about pre-existing data, it is sometimes referred to as "data about data."

UNCLASSIFIED//FOUO
ENTERPRISE SECURITY OPERATIONS CENTER (ESOC)

Requests for analysis of metadata submitted by operational divisions (e.g., the Counterintelligence Division) are individually reviewed and require supervisory approval. In the event that information about metadata analyzed by ESOC is disseminated outside of enterprise security personnel, such dissemination is made to personnel with investigative responsibility for FBI IT systems on a need to know basis. If actual metadata is to be used for investigative purposes, the component involved is referred to the particular IT system containing the original data. There is no dissemination of ESOC data outside the FBI.

2. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

_____ NO.

___X___ YES. [If yes, please continue.]

3. Does the system/project pertain only to government employees, contractors, or consultants?

_____ NO.

___X___ YES.

Since ESOC analyzes metadata from FBI internal IT systems, the metadata is limited to FBI employees, contractors or consultants with access to those systems.

4. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

_____ NO.

___X___ YES.

Metadata retrieved by ESOC may include the name or other personal identifier of FBI employees, contractors or consultants with access to FBI IT systems.

5. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project?

_____ NO.

___X___ YES. If yes, check all that apply:

___X___ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

___X___ SSNs are necessary to identify FBI personnel in this internal administrative system.

_____ SSNs are important for other reasons. Describe:

___X___ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

UNCLASSIFIED//FOUO

UNCLASSIFIED//FOUO
ENTERPRISE SECURITY OPERATIONS CENTER (ESOC)

Only ESOC users conducting searches or analysis with specific need-to-know may access SSNs.

N/A It is not feasible for the system/project to provide special protection to SSNs.
Explain:

6. Does the system/project collect any information directly from the person who is the subject of the information?

X NO. [If no, proceed to question 7.]

_____ YES.

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

_____ YES. [If yes, proceed to question 7.]

_____ NO.

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

_____ NO. [The program will need to work with PCLU to develop/implement the necessary form(s).]

_____ YES. Identify any forms, paper or electronic, used to request such information from the information subject:

7. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

_____ NO. If no, indicate reason; if C&A is pending, provide anticipated completion date:

X YES. If yes, provide date of last C&A certification/re-certification:

The ESOC network and environments were re-accredited on April 15, 2008.

_____ Don't Know.

8. Is this system/project the subject of an OMB-300 budget submission?

_____ NO.

_____ Don't know.

X YES. If yes, please provide the date and name or title of the OMB submission:

An OMB 300 for ESOC dated April 25, 2008 was submitted to OMB.

UNCLASSIFIED//FOUO

UNCLASSIFIED//FOUO
ENTERPRISE SECURITY OPERATIONS CENTER (ESOC)

9. Is this a national security system (as determined by the SecD)?

_____ NO. X YES. _____ Don't know.

10. Status of System/ Project:

_____ This is a new system/ project in development. [If you checked this block, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PLA and/or other actions are required.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed? October 1, 2003.

2. Has the system/project undergone any significant changes since April 17, 2003?

_____ NO. [If no, proceed to next question (II.3).]

 X YES. If yes, indicate which of the following changes were involved (mark all boxes that apply):

_____ A conversion from paper-based records to an electronic system.

_____ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

_____ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

_____ A change that results in information in identifiable form being merged, centralized, or matched with other databases.

_____ A new method of authenticating the use of and access to information in identifiable form by members of the public.

_____ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

_____ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

_____ A change that results in a new use or disclosure of information in identifiable form.

_____ A change that results in new items of information in identifiable form being added into the system/project.

 X Changes do not involve a change in the type of records maintained, the individuals

UNCLASSIFIED//FOUO

UNCLASSIFIED//FOUO
ENTERPRISE SECURITY OPERATIONS CENTER (ESOC)

on whom records are maintained, or the use or dissemination of information from the system/project.

_____ Other. [Provide brief explanation]:

Technical improvements to ESOC since its initial operation permit monitoring and analysis of additional FBI IT systems and databases. However, the types of monitoring and analysis performed by ESOC on IT systems and databases remains unchanged.

3. Does a PIA for this system/project already exist? _____ NO. _____ X YES. If yes:

a. Provide date/title of the PIA:

Enterprise Security Operations Center (ESOC), January 25, 2006.

b. Has the system/project undergone any significant changes since the PIA? _____ NO _____ X YES

As discussed in II.2, supra, technical enhancements to ESOC since the 2006 PIA permit monitoring and analysis of additional FBI IT systems and databases. However, the types of monitoring and analysis performed by ESOC on IT systems and databases remains unchanged.

[The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

**CHECKLIST FOR PRIVACY COMPLIANCE FOR
FBI ROUTINE DATABASES**
(including comparable applications)

This checklist is based on the FBI Privacy Impact Assessment (PIA) for FBI Routine Databases of 4/7/08 as approved 8/29/08 (190-HQ-C1321794 Serial 432, 9/8/08). Per the PIA, this checklist may be used in lieu of any additional PIA (or PTA), so long as every one of the twelve blocks below can be checked. This checklist should be completed by the database manager (or other appropriate official/ as determined by the division) and approved by the Division Privacy Officer. [If warranted, add classification markings.]

A. Add date checklist prepared: May 18, 2009

B. Provide name and brief description of database (or comparable application):

As used in this document, Enterprise Security Operations Center (ESOC) is a data warehouse monitoring a number of connected FBI IT systems and databases. ESOC contains metadata and related audit data (data about users accessing data) from these systems and databases.

C. Identify program division and unit/squad:

Security Division, Information Assurance Section, ESOC

D. Provide name, address, and phone number of point of contact:

[REDACTED] JEH/10674, [REDACTED]

b6
b7C

E. Checklist (all must be checked as being accurate for this database/application):

- ☒ 1. Information in the system identifies individuals, either directly or indirectly. An individual can be identified indirectly through a combination of descriptors such as gender, race, birth data, geographic indicator, license number, or license plate number.¹
- ☒ 2. The system derives information from FBI records covered by existing Privacy Act system of records notices (http://foia.fbi.gov/rec_sys.htm) regardless of format in which those records are maintained and/or from information that is publicly available at no cost. (If information comes from FBI records that are not covered by existing systems of records notices, contact the PCLU.)
- ☒ 3. Neither commercial data nor paid subscription service data is included in the database unless that information is derived from existing FBI records.

¹ Systems that do not contain any personally identifiable information need not complete this checklist.

☒ 4. The system can be accessed only by members of a particular office, unit, squad or other similar FBI entity and sharing of information is based strictly on an operational need to know.

☒ 5. The system is not used for purposes of pattern-based data mining.

NOTE: While ESOC does search for, and analyze, suspicious patterns of IT system access and use, such activity is designed to detect possible espionage activity involving FBI IT systems. The activity is therefore related to the security of FBI IT systems and excluded from the definition of reportable data mining, pursuant to 42 U.S.C. § 2000ee-3(C)(ii).

☒ 6. Initial and continued access to the system is subject to permission controls enforced by FBI supervisory personnel, including the use of access passwords.

☒ 7. Access to the system can be audited.

☒ 8. The system is part of an established platform on which a Security Certification and Accreditation has been performed.

☒ 9. The system was developed after April 17, 2003.

☒ 10. If the system maintains information about U.S. citizens or legal permanent residents, it is covered by a published Privacy Act System of Records Notice.

NOTE: To the extent that ESOC accesses or maintains metadata concerning access and use of FBI IT systems that contains information about U.S. Citizens or lawful permanent residents, such information formally resides in one or more FBI records systems covered by published System of Records Notices. These systems include the Central Records System (JUSTICE/FBI-002), the Electronic Surveillance (ELSUR) Indices, JUSTICE/FBI-006, the Bureau Personnel Management System (BPMS, JUSTICE/FBI-008), and the Terrorist Screening Records System (TSRS, JUSTICE/FBI-019).

☒ 11. Records retention issues have been discussed with the Records Management Division.

NOTE: RMD has been consulted regarding Federal records/electronic records issues. RMD has advised that, since all the information in ESOC originates and resides in other FBI systems, ESOC is not a system of record.

☒ 12. Any personally identifiable information placed on a mobile device or on media that is transported outside FBI facilities must comply with the FBI policy on encryption and must be password protected.

NOTE: It is not anticipated that PII from ESOC will be placed on mobile devices or media that will be transported outside of FBI facilities. In the event that PII is placed on removable media, the information will be encrypted.

F. If a database contains information that may be considered sensitive/controversial or is maintained as part of a larger FBI program, the database administrator or program manager (or division privacy officer) must consult with the FBI's Office of the General Counsel, Privacy and Civil Liberties Unit, about the potential need to assess the privacy risks in a separate PIA.

G. File Notes (summarize any additional information that may be warranted for record purposes, e.g., coordination with OGC, etc.):

The ESOC PTA and this checklist have been coordinated with AGC [REDACTED] in OGC/PCLU. Based on the nature of the metadata in ESOC and its use in monitoring FBI IT systems and databases against illegal or unauthorized use in connection with espionage activity, ESOC has been determined to be a routine FBI database.

APPROVING OFFICIALS

Program Manager (or other appropriate official as division determines)	Division Privacy Officer
Signature: [REDACTED]	Signature: <i>Michael F. Morehart</i>
Date signed: 7/2/07	Date signed: 7/2/07
Name: [REDACTED]	Name: Michael F. Morehart
Title: Program Manager	Title: SecD DAD

b6
b7C

DISTRIBUTION:

- File signed original (or copies) in one or more official division/program files for documentation, inspection, records, and other oversight purposes.
- Forward copy to the FBI Privacy and Civil Liberties Unit (PCLU) (JEH 7338).

(OGC/PCLU (Rev. 08/16/2010))

FBI PRIVACY THRESHOLD ANALYSIS (PTA)
(Equivalent to the DOJ Initial Privacy Assessment (IPA))

NAME OF SYSTEM / PROJECT:

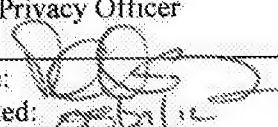

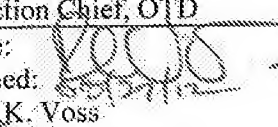

b7E

After all division approvals, forward signed hard copy plus electronic copy to FBI OGC/PCLU (JEH/7350).
(The FBI Privacy and Civil Liberties Officer's determinations, conditions, and/or final approval will be recorded on the following page.)

~~UNCLASSIFIED//FOUO~~

FINAL FBI APPROVAL / DETERMINATIONS / CONDITIONS: [This section will be completed by the FBI PCLU/PCLO following PTA submission. The PTA drafter should skip to the next page and continue.]

☒ PIA is required by the E-Government Act.

☐ PIA is to be completed as a matter of FBI/DOJ discretion.

☐ PIA is not required for the following reason(s):

☐ System does not collect, maintain, or disseminate PII.

☐ System is grandfathered (in existence before 4/17/2003; no later changes posing significant privacy risks).

☐ Information in the system relates to internal government operations.

☐ System has been previously assessed under an evaluation similar to a PIA.

☐ No significant privacy issues (or privacy issues are unchanged).

☐ Other (describe):

Applicable SORN(s): DOJ/FBI-002, Central Records System

Notify FBI RMD/RIDS per MIOG 190.2.3? ☐ No ☒ Yes--See sample EC on PCLU intranet website here:
http://home/DO/OGC/LTB/PCLU/PrivacyCivil%20Liberties%20Library/form_for_miog190-2-3_ec.wpd

SORN/SORN revision(s) required? ☐ No ☒ Yes (indicate revisions needed): This system can be covered in a separate SORN for intercepted information.

Prepare/revise/add Privacy Act (e)(3) statements for related forms? ☒ No ☐ Yes (indicate forms affected):

b7E

RECORDS. The program should consult with RMD to identify/resolve any Federal records/electronic records issues. The system may contain Federal records whether or not it contains Privacy Act requests and, in any event, a records schedule approved by the National Archives and Records Administration is necessary. RMD can provide advice on this as well as on compliance with requirements for Electronic Recordkeeping Certification and any necessary updates.

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: (a) name of the system/project, including associated acronyms; (b) structure of the system/project, including interconnections with other projects or systems; (c) purpose of the system/project; (d) nature of the information in the system/project and how it will be used; (e) who will have access to the information in the system/project; (f) and the manner of transmission to all users.

b7E

b7E

b7E

b7E

b7E

b7E

b7E

2. Does the system/project collect, maintain, or disseminate any information about individuals (i.e., a human being or natural person, regardless of nationality)?

 NO [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no FIA is required.]

 X YES [If yes, please continue.]

3. Please indicate if any of the following characteristics apply to the information in the system about individuals: Bear in mind that log-on information may identify or be linkable to an individual.

(Check all that apply.)

- ☒ The information directly identifies specific individuals.
- ☒ The information is intended to be used, in conjunction with other data elements, to indirectly identify specific individuals.
- ☒ The information can be used to distinguish or trace an individual's identity (i.e., it is linked or linkable to specific individuals).

If you marked any of the above, proceed to Question 4.

None of the above. If none of the above, describe why the information does not identify specific individuals either directly or indirectly. [If you checked this item, STOP here after providing the requested description.]

4. Does the system/project pertain only to government employees, contractors, or consultants?

☒ NO ☐ YES

5. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

☐ NO. [If no, skip to question 7.]

☒ YES. [If yes, proceed to the next question.]

6. Does the system/project collect any information directly from the person who is the subject of the information?

☐ NO [If no, proceed to question 7.]

☒ YES

a. Does the system/project support criminal, CT, or FCI investigations or assessments?

☐ NO

☒ YES [If yes, proceed to question 7.]

b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

☐ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

☐ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project? Full SSNs should only be used as identifiers in limited instances.

☐ NO ☒ YES If yes, check all that apply:

☐ SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

☐ SSNs are necessary to identify FBI personnel in this internal administrative system.

☐ SSNs are important for other reasons. Describe:

☐ The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

☒ It is not feasible for the system/project to provide special protection to SSNs.

Explain:

b7E

8. Is the system operated by a contractor?

☒ No.

Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be imposed as a matter of Department of Justice policy. Consultations with the Office of the General Counsel may be required if a contractor is operating the system for the FBI.

9. Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

 X NO If no, indicate reason; if C&A is pending, provide anticipated completion date: Pending. Note the C&A conducted for is separate and apart from the C&A conducted for Insight-State & Local.

b7E

 YES If yes, please indicate the following, if known:

Provide date of last C&A certification/re-certification:

Confidentiality: Low Moderate High Undefined

Integrity: Low Moderate High Undefined

Availability: Low Moderate High Undefined

 Not applicable -- this system is only paper-based.

10. Is this system/project the subject of an OMB-300 budget submission?

 X NO

 YES If yes, please provide the date and name or title of the OMB submission:

11. Does the system conduct data mining as defined in Section 804 of the Implementing Recommendations of the 9/11 Commission Act of 2007, P.L. 110-53 (codified at 42 USC 2000ee-3)?

 X NO

 YES If yes, please describe the data mining function:

12. Is this a national security system (as determined by the SecD)?

 X NO

 YES

13. Status of System/ Project:

 X This is a new system/ project in development. [If you checked this block, STOP. The FTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

 NO [If no, proceed to next question (II.3).]

 YES If yes, indicate which of the following changes were involved (mark all changes that apply, and provide brief explanation for each marked change):

 A conversion from paper-based records to an electronic system.

 A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

 A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

 A change that results in information in identifiable form being merged, centralized, or matched with other databases.

 A new method of authenticating the use of and access to information in identifiable form by members of the public.

 A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

 A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

 A change that results in a new use or disclosure of information in identifiable form.

~~UNCLASSIFIED//FOUO~~

_____ A change that results in new items of information in identifiable form being added into the system/project.

_____ Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

_____ Other [Provide brief explanation]:

3. Does a PIA for this system/project already exist?

_____ NO _____ YES

If yes:

a. Provide date/title of the PIA:

b. Has the system/project undergone any significant changes since the PIA?

_____ NO _____ YES

[The PIA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

~~UNCLASSIFIED//FOUO~~
